

CiviCRM support for RSM 2000 Paperless Direct Debit

Requirements

This module requires CiviCRM 4.2.x or greater and Drupal 7.x. or Wordpress 3.4.2

Installation Instructions

To install the RSM 2000 Paperless Direct Debit move the files under 'civicrm_custom/custom_php/CRM/Core/Payment' to your sites `[Custom PHP directory]/CRM/Core/Payment` directory.

If the Custom PHP directory is not set, please set it in Administer > Configure > Global Settings >

Directories

For details of how to set custom directories see here:

<http://wiki.civicrm.org/confluence/display/CRMDOC33/Directories>

Import the Payment Processor Type

To import the Payment Processor Type, please import the file 'script.sql' to your civicrm database.

Add the payment Processor

To add the payment Processor, navigate to Administer > Configure > Global Settings > Payment

Processors.

Now click 'Add Payment Processor' button.

Select Payment Processor Type : 'RSM2000' and please give the name as ' RSM2000 DD'.

And set your credentials in the Username , Password, Singature, URL etc .

Now, you can create contribution or event pages with RSM2000 Direct Debit for online payment.
